Class Info

Time: T / Th 9:00 - 10:15 am

Location: TBD

[Course Website](#)

[Canvas Page](#)

Course Description

In 1954, the Supreme Court ordered schools to integrate “with all deliberate speed.” 70 years later, in 2021, an alarming third of K-12 students were attending effectively segregated schools (defined as schools where 75% or more of students are racially or ethnically homogenous) (GAO, 2022). How did the U.S. get here? What went wrong? Did anything go right?

Instructor Info

Danielle Graves

(she/her)

dcgw@bu.edu

Understanding school segregation today requires not only an understanding of the Civil Rights movement, but also an appreciation of the history of public education in the United States. The class will proceed chronologically, beginning with de jure segregation and ending with a review of across and within-school segregation today. Throughout, we will repeatedly visit themes inextricable from school segregation: legal institutions, residential segregation, and school finance. The goals of this class are two fold: to help students gain an understanding of the framework within which school segregation persists today and to give students the confidence to write compelling economic research papers on the origins and consequences of such segregation. Students will receive feedback on the research process at each step of the way. We will also build the researcher’s toolkit by reviewing some common empirical strategies used in this literature.

Office Hours

Tues 10:30 - 12 pm

Fri 9-11 am

Clover (Science Center)

Walk-in or [by appointment](#)

Prerequisites

Ec 1010a or 1011a; Stat

100 (or equivalent)

Come to Office Hours!

Research is hard. Please do not hesitate to come to office hours– I want to make conducting economics research feel approachable and accessible for all of you. In the second week of class, everyone is required to schedule an OH slot with me. [Schedule OH here.](#)

Course Requirements

***Class Participation* 15%**

Reading assignments are listed under each class meeting date. You are expected to read all of the material that is starred ★ – however, you are not expected to *understand* all of the material. Come to class with questions and comments. We will spend around 30-45 minutes each class discussing each starred paper.

***Leading Class Discussions and Response Papers* 20%**

The purpose of these exercises is to get you practicing two important skills in research: thinking critically about papers and generating new ideas. Don’t put too much pressure on yourself – I do not expect all of these ideas to be good!

Response papers: Every week, you will write a 2 page (size 12, Times New Roman, 1 inch margins, double-spaced) response paper on one of the starred ★ readings. These are due **5 pm before the day we cover the paper in class**. Most weeks, you will summarize the paper, then discuss pros, cons, and directions for future research. Some weeks, there will be specific prompts (for example, defining key terms). If there is a specific prompt for the next weeks’ response paper, it will be posted by 5 pm on Friday. *NOTE: A response paper is not due the weeks of January 25, April 23, or the weeks you are leading a*

class discussion. This means you will write 8 of these papers.

Leading Class Discussions: Each student will present twice for 5 minutes on a paper from the class syllabus. The student will then lead (with some help) the class discussion (this will last around 30-40 additional minutes). Students will submit their preferences at the beginning of the term. Slides are due **5 pm before the day we cover the paper in class**.

Stata / R Minicourse Problem Sets (4) 10%

As part of EC970, all students participate in the Stata / R minicourse. You will complete four problem sets. This minicourse is an excellent opportunity to learn how to code and handle data *responsibly*. The [canvas webpage](#) for the course is an excellent resource.

Short Papers 10%

Measuring Segregation 5%

This assignment introduces students to measures of segregation. Students will write a short paper (4-6) that discusses the pros and cons of different measures.

Explain a Model 5%

Students will write a short paper (4-6 pages) that outlines a framework ("model") of behavior based on the abstract of a paper from the reading list. The goal of this assignment is to give students practice in conceptualizing mechanisms that drive empirical results.

Final Research Paper 40%

Throughout this course, you will build a final research paper. The final product should be **15-18 pages** (size 12, Times New Roman, 1 inch margins, double-spaced). This paper will be on a topic of your choosing that falls in the realm (broadly defined) of this class.

Final Presentation 5%

Each student will present on their final research paper for 15 minutes total. This time includes questions from the audience – when you practice your talk (and you should absolutely practice your talk), it should take around 10-12 minutes. Both asking and responding to questions in research seminars are important skills, and all students are required to ask at least one question (and more questions are encouraged!)

Due Dates

All assignments, with the exception of the rough draft and peer review, **should be turned into canvas by 5 pm on the indicated day**.

Response papers	5 pm the night before the class in which we cover the paper
Slides are due	5 pm the night before the class in which we cover the paper
A1 Measuring Segregation	Thursday, February 1
Stata R Problem Set 1	Friday, February 9
A2 Explain a Model	Thursday, February 15
Stata R Problem Set 2	Friday, February 23
A3 Three Ideas	Thursday, February 29
Stata R Problem Set 3	Friday, March 8
Stata R Problem Set 4	Friday, March 22
A4 Data Description and Summary Statistics	Tuesday, March 28
A5 Introduction, Outline, and Empirical Strategy	Tuesday, April 2
A6 Rough Draft	Tuesday, April 9
A7 Rough Draft Peer Review	Thursday, April 9 at 9 AM
A8 In-Class Final Presentations	Thursday April 18 and Tuesday 23
A9 Final Paper	Wednesday, May 1 at 5 PM

Course Policies

Attendance and Extensions: Attendance is mandatory. More than one extension is discouraged, but allowed under exceptional circumstances.

- **You get one freebie absence and one freebie extension with no questions asked.** The extension shall be for no more than 3 days and cannot be applied to response papers, class presentations, peer review, or the Stata / R problem sets.
- If you are sick, please don't come to class. If you must come to class sick (even if it's just the sniffles!), I ask that you wear a mask. Please e-mail me to let me know if you are sick. If you don't e-mail me **before class**, I will assume you are using your one freebie absence.
- If absent for any reason (with the exception of your one freebie absence), you will be expected to write an additional response paper on the day's reading and schedule office hours with me to make up the class.
- Any other absences and **any** extensions must be cleared in advance with me.
 - **Acceptable reasons for an excused absence / extension include**, but are not limited to, medical emergencies, scheduled family gatherings (such as a wedding), or the death of a loved one.
 - I ask that, except in the case of emergencies, you discuss planned absences / extensions with me at least **two weeks in advance** by coming up to me after class.
 - There will be a **maximum of one extension** granted for each assignment.
 - **No extensions will be granted for the final paper** – this deadline is set by the department. Plan ahead accordingly!

If you are incredibly sick, please do not make yourself sicker by pulling an all-nighter to finish an assignment for this class. In fact, please don't pull all-nighters! You have all of the deadlines for this class listed above. My hope is that you will use them to plan ahead, just as researchers must plan ahead around conferences and seminars. My policy is to not give extensions because of conflicting deadlines with other classes.

Late work policy: No late assignments will be accepted, with the exception of your one freebie extension. If unforeseen circumstances arise, please reach out to me.

Emails: You can expect me to answer questions within 24 hours, with the exceptions of weekends: questions sent on Friday, Saturday or Sunday can expect a response by the end of day Monday.

- In return, I expect you to budget your time appropriately: a good rule of thumb is to ask any urgent questions at least **36 hours in advance** of a deadline so that I have time to respond and you have time to digest.
- **Please include EC970 in the subject line** to help me find your e-mail faster.

Laptop Use: No laptop or electronic use is permitted during class. You may use a tablet to take notes, but please put it in airplane mode. The goal of this policy is to create an environment that is conducive to an engaging classroom discussion, and that requires you to be present both physically and mentally.

Accessibility: Please contact me if you need special arrangements to use a laptop or any other accommodation.

Plagiarism: "Students who, for whatever reason, submit work either not their own or without clear attribution to its sources will be subject to disciplinary action, up to and including requirement to withdraw from the College." – *Harvard College Handbook for Students*. If you cheat, you will fail this class.

Collaboration: Discussion of papers and problem sets with others is permitted and encouraged. Copying others is not. Every student is expected to turn in their own unique work.

Generative AI: ChatGPT and other generative AI are tools you should learn to use **responsibly**. Examples of acceptable use include:

- "Polishing" a draft
- Asking for simple explanations of concepts (e.g. "can you explain fixed effects for me?" or "how do I interpret β in OLS?")

Examples of unacceptable use include:

- Writing code for Stata / R problem sets: as researchers, we must be responsible stewards of data. Writing code manually will help you understand the nuts and bolts of the assumptions you make when you manipulate and analyze data, which you must acknowledge when conducting research.
- Writing first drafts: ChatGPT will often make up citations or describe identification strategies you didn't do. Your research is the result of *you* analyzing a data set and running (likely) a regression-based analysis. ChatGPT cannot and should not do this for you.
- Writing response papers: We will cover this in more depth in class.

A note of caution: citation fabrication, or citation faking, happens when AI generates fictional citations. Accurate citations are vital for trust. Responsible AI use requires verification by researchers and writers to ensure legitimacy.

Support

Academic Resources: I encourage you to attend office hours. The material we will be covering is dense.

[Academic Resource Center](#) has tutoring services, workshops, coaching and other resources

Mental and Physical Health Resources: Please take care of yourself.

- [Harvard University Health Services \(HUHS\)](#)
- [Counseling and Mental Health Services \(CAMHS\)](#)
- [Center for Wellness and Health Promotion](#)

Tips and Expectations for Writing Research Papers

[Writing Economics](#) contains tips on how to review the literature, find a research topic and write a paper. We will read portions of this throughout the term in conjunction with the final research paper process.

In general, you will should strive to:

- *Synthesize*, not summarize existing literature
- Connect your ideas with the work of those who came before you
- Convince the reader that your paper is worth reading

Supplementary Readings

Coding Resources

- The [canvas webpage](#) for the Stata / R mini course has excellent resources for coding.
- There are dedicated TFs for the Stata / R minicourse. Make use of them! Go to their office hours. They will give you better coding help (especially in Stata) than I.
- For R, I recommend [R for Data Science](#), a free, online, well-written and frequently updated textbook.

You have the option of writing your problem sets in either R or Stata. I use R. I rarely use Stata. I like R because it is free, you can use it to read in Stata files, and you can make beautiful graphs with ggplot. Downsides of R are that some econometrics package run smoother in Stata. However, at the end of the day, the most important thing is that you pick a language and learn it well. Most graduate student's language of choice is entirely dependent on the language that their first boss had them code in. My first job was in data science, and Stata is almost never used in non academic settings, so now I use R.

Writing Resources

Throughout the class, we will be reading and discussing [Writing Economics: A Guide for Harvard Economics Concentrators](#) by Robert Neugeboren with Mireille Jacobson. This resource will serve as a valuable guide in crafting and structuring your research papers.

I also recommend [The Little Book of Research Writing](#) by Varanya Chaubey. We will cover the RAP (Research Question, Answer, Positioning Statement) approach in class.

Highly Recommended Books

All of these books are available on HOLLIS. However, if you love these books as much as I do, I recommend using [thriftbooks.com](#), an online used book dealer. You can often get books 75-90% off!

- [Children of the Dream: Why School Integration Works](#), by Rucker C. Johnson

An excellent overview of the economic impacts of school integration. The appendix is a great resource for literature reviews.

- [The Reconstruction of Southern Education: the Schools and the 1964 Civil Rights Act](#)
Written in 1969, this is a detailed account of the implementation of the 1964 Civil Rights Act and its impact on school integration
- Bonus! Podcast: Nice White Parents (available wherever you get your podcasts)
A case study of the integration and segregation of one school in New York.

Readings Schedule

Readings you may write a response paper on are indicated by ★

Other required readings are indicated by ☆

All readings are available in HOLLIS. For your convenience, starred readings are linked

Week 1

No response paper due this week

1: Introduction and Metrics Review January 23

Metrics Handout: Common Empirical Strategies

Data Handout: Education Data Sources

We will discuss these in class. No need to review prior.

2. Frameworks for Conceptualizing Segregation January 25

Preferences for in class presentations due by 5 pm

- ★ Darity Jr., William A. (June 2022). "Position and Possessions: Stratification Economics and Intergroup Inequality". In: *Journal of Economic Literature* 60.2, pp. 400–426 [link](#)
- Frankel, David M. and Oscar Volij (Jan. 1, 2011). "Measuring School Segregation". In: *Journal of Economic Theory* 146.1, pp. 1–38
- Massey, Douglas S. and Nancy A. Denton (Dec. 1, 1988). "The Dimensions of Residential Segregation". In: *Social Forces* 67.2, pp. 281–315 [link](#)
- ☆ [Writing Economics](#), pgs. 14-19

Week 2

Everyone required to come to OH either Tuesday (1/30) or Friday (2/3) of this week

3: The Beginning of De Jure Segregation January 30

- Carruthers, Celeste K. and Marianne H. Wanamaker (Apr. 1, 2017). "Returns to School Resources in the Jim Crow South". In: *Explorations in Economic History* 64, pp. 104–110
- Collins, William J. and Robert A. Margo (June 2003). *Historical Perspectives on Racial Differences in Schooling in the United States*. URL: <https://www.nber.org/papers/w9770> (visited on 08/29/2023). preprint
- ★ Margo, Robert A. (Jan 1990). "Race and Schooling in the South: A Review of the Evidence." [Race and Schooling in the South, 1880-1950: An Economic History](#). University of Chicago Press, pp. 6-32

Professor Margo will visit class for the last 20 minutes. Come prepared with questions!

4: Financing Segregated Schools February 1

Measuring Segregation Due

- Carruthers, Celeste K. and Marianne H. Wanamaker (May 1, 2013). "Closing the Gap? The Effect of Private Philanthropy on the Provision of African-American Schooling in the U.S. South". In: *Journal of Public Economics* 101, pp. 53–67 [link](#)
- Carruthers, Celeste K. and Marianne H. Wanamaker (Apr. 1, 2017). "Returns to School Resources in the Jim Crow South". In: *Explorations in Economic History* 64, pp. 104–110

- ★ Reber, Sarah J. (2011). "From Separate and Unequal to Integrated and Equal? School Desegregation and School Finance in Louisiana". In: *The Review of Economics and Statistics* 93.2, pp. 404–415 [link](#)
- ★ [Writing Economics](#), pgs. 1-10

Week 3

5: Successes and Failures of Brown February 6

- Ashenfelter, Orley, William J. Collins, and Albert Yoon (July 1, 2006). "Evaluating the Role of Brown v. Board of Education in School Equalization, Desegregation, and the Income of African Americans". In: *American Law and Economics Review* 8.2, pp. 213–248
- ★ Cascio, Elizabeth et al. (Sept. 1, 2008). "From Brown to Busing". In: *Journal of Urban Economics* 64.2, pp. 296–325 [link](#)
